

Comparison of Tapyrus & other Blockchains

Tapyrus combines the advantages of public blockchain and consortium one, and is suitable for enterprise use as its high cost performance.

Chain Types	Hybrid	Public	Consortium	Private
Security	Distributed ledger	Distributed Ledger	Same as Web system	Same as Web system
Cost	Medium	*Impossible to envision	Huge	Large
Typical Example	Tapyrus	Ethereum	HyperLedger Fabric	Corda
Volatility	No	Yes	No	No
Governance	Yes (Consortium)	No	Yes (Consortium)	Yes
Scalability	High	Low	High	High
Transparency	Yes	Yes	No	No
Cooperation	Yes	Yes	Yes (Conditional)	Yes (Conditional)
